

Managing Child and Adolescent Health Issues in a Primary Care Setting

Program Information

Mental Health Collaborative (MHC) Continuing Professional Development (CPD) program supports Alberta primary care providers' efforts to meet the mental health needs of children and adolescents.

The CPD program is intended for primary care practitioners who see children and adolescents with mental health problems.

Objectives

These courses are ideal for professionals that provide services to children or youth with addiction or mental health issues including: Physicians, Social Workers, Nurses, Counsellors, Psychologists.

By the end of these courses, participants will be equipped to:

- Manage the mental health needs of their young patients,
- Engage in inter-professional dialogue among health care providers treating or working with child and adolescent mental health problems.

Accreditation

After an evaluation of our program, the demographics of our participants, and changing requirements for claiming credits, it has been decided that CPD will not be accredited for the 2026-27 curriculum year.

However, we will continue to provide the same level of educational integrity and adherence to the National Standard that you have come to expect from our program.

Comments regarding accreditation can be forwarded to cpd@recoveryalberta.ca
